

Morning Michelle

In response to Cllr. Sumbler's questions on the LTP.

We did not publish an implementation plan for the last 4 years of the plan as the work was interrupted by Covid. However we did produce an update which went to our Scrutiny Committee last month.

Attached below is a link to the report.

I have spoken to the team and we are in the process of writing the next plan in conjunction with BCP, and whilst smaller schemes are considered, these have to be assessed against our strategic priorities and funding available.

Please see response from the team on the issue of dropped kerbs:- Our annual Integrated Transport Block capital settlement from Government of £1.9m for local transport scheme improvements is conditional on us publishing and implementing a Local Transport Plan which is consistent with Government priorities for Transport. We receive far more requests for schemes than our budget allows and we therefore prioritise according to our strategic objectives to demonstrate that we are spending the money in accordance with our published plan. This means that only those schemes which make the biggest impact in terms of Economic Growth, Climate Change, Safety Security and Health, Equality of Opportunity and Quality of Life while demonstrating good value for money can be constructed. While there is merit in the proposals that Corfe Castle has put forward, there is a long list of higher scoring schemes which are in development and waiting for funding.

I refer you to the [Dorset Council highway improvements schemes policy](#) and to the [LTP3 Bournemouth Poole Dorset Summary Document](#) for further information.

Preparatory work on a new joint LTP4 has commenced. This work is developing the evidence and baseline. We are awaiting new LTP Guidance from Government. The new guidance is expected to be published anytime.

[LTP3 review report](#).

Regards
