

Motion: Corfe Castle Parish Council supports the Environment Working Group progressing with their Queen's Platinum Jubilee Tree planting project.

In accordance with Item 5 in the Environment Working Group Action Plan Terms of Reference, "a progressive tree planting programme", the Group carried out a survey of Corfe Castle village early in 2021 to identify possible sites for tree planting. When the Queen's Green Canopy was announced for the Jubilee, the Group decided to link the tree planting project with this national Jubilee Project, with the aim of planting 70 trees for 70 years. Details of these possible sites were shared at the Annual Parish Meeting last May, **see attached maps**. As a lot of the possible sites were identified as being owned / leased by Dorset Council, contact was eventually made with the relevant Dorset Council Officer to investigate whether permission might be granted for these sites. To date, contact has not been made with any other landowners.

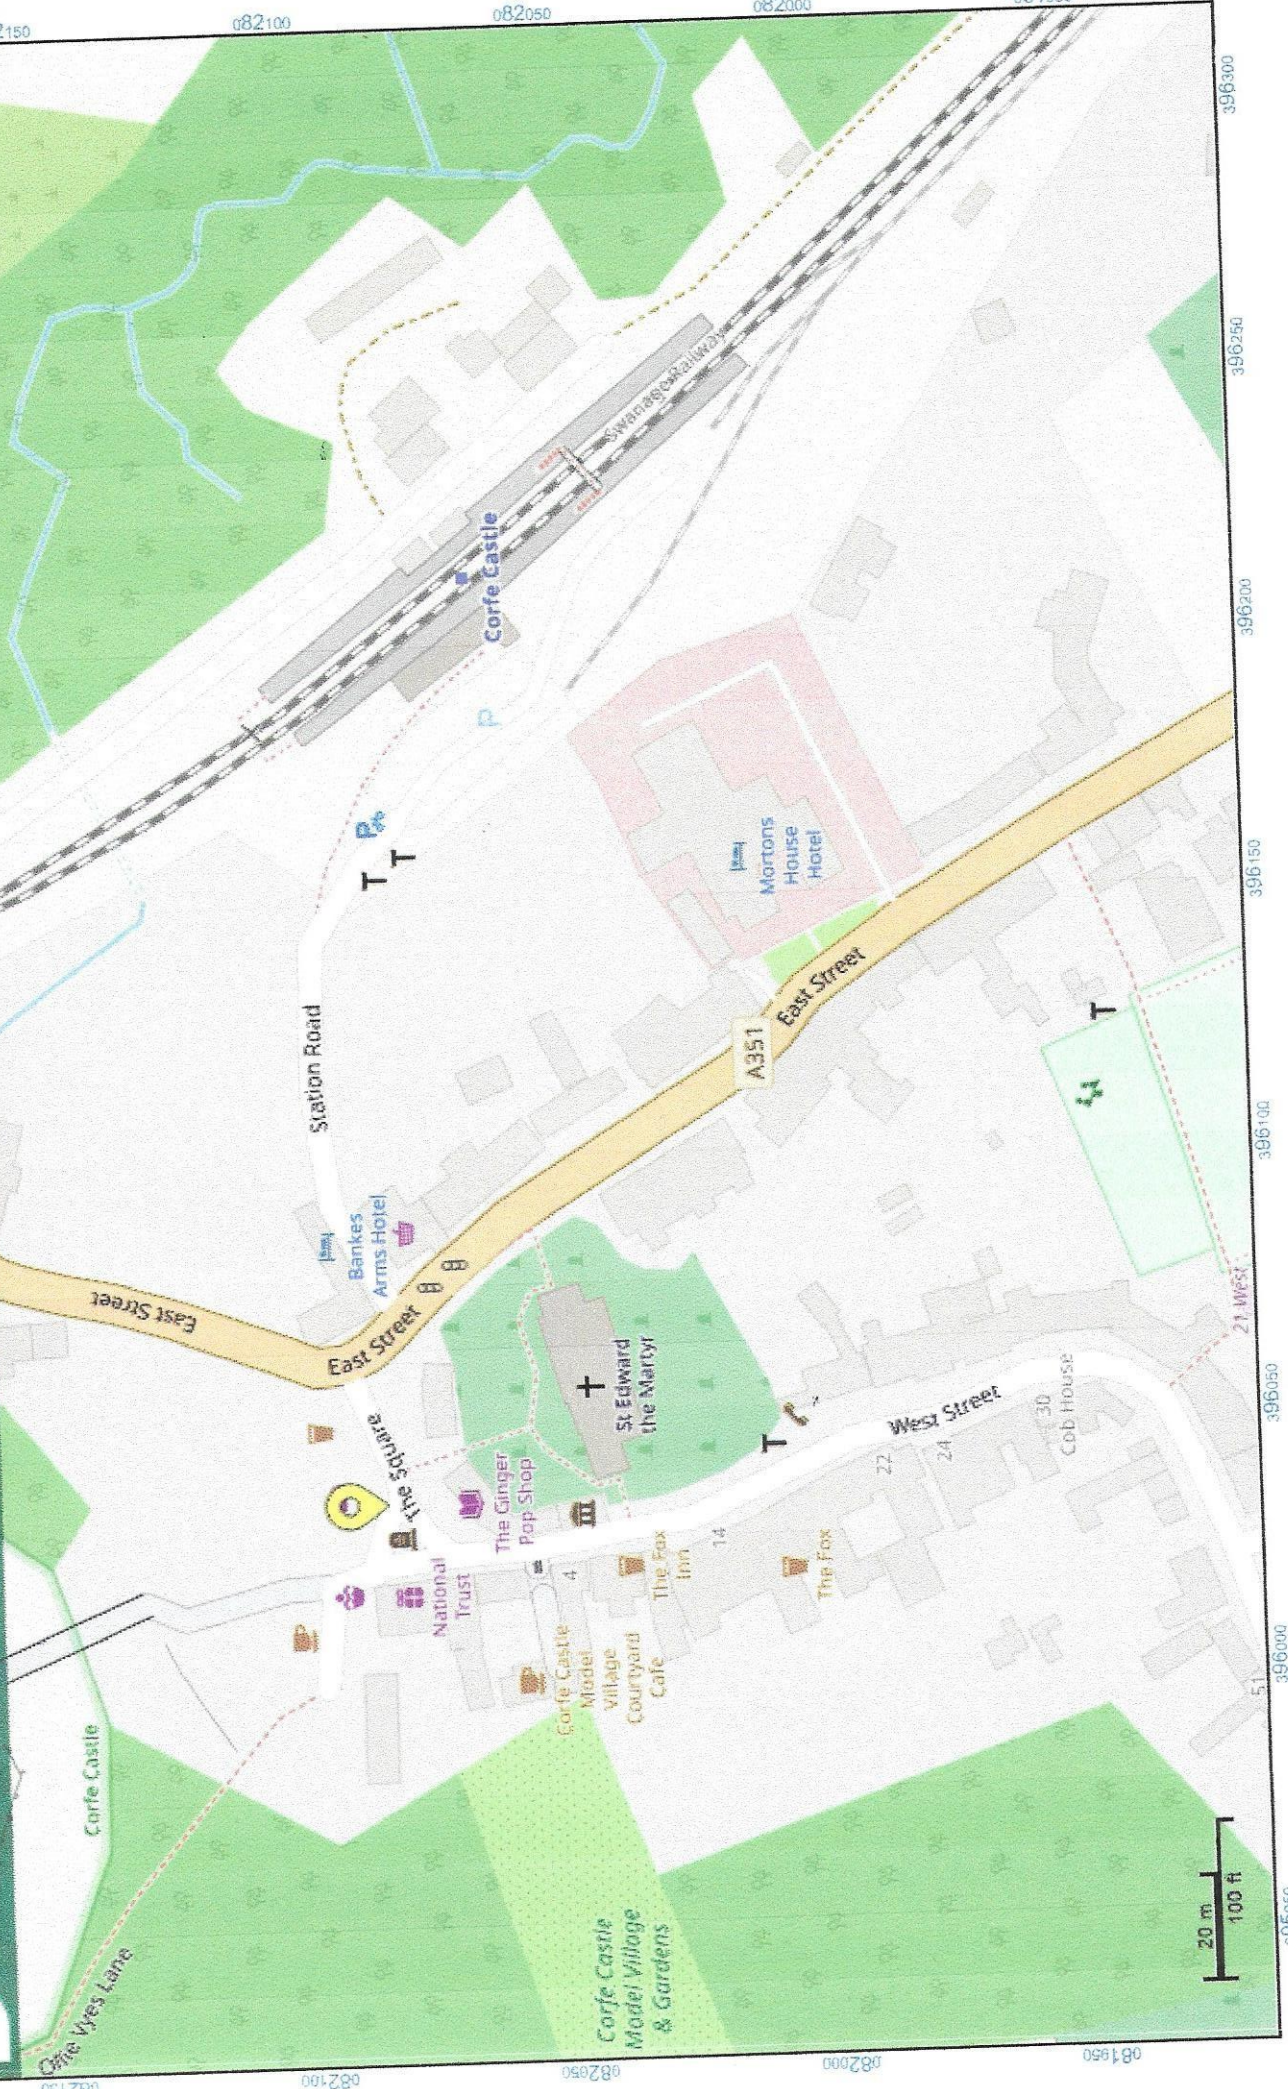

As some members of the Group have recently been involved with tree / hedge planting in the Parish, it was suggested that, in parallel with the 70 trees for 70 years part of the Jubilee project, the Group also undertakes a further element to the tree planting project. The Group would encourage community groups, landowners and other organisations to contribute to a 70 x 70 trees project, with the target of planting 4,900 trees across the Parish as part of the Queens Green Canopy, including trees planted as part of hedge planting projects. This part of the project would involve contacting groups, landowners and other organisations carrying out planting in the Parish, and requesting permission to include their trees in the Parish total. As this part of the tree planting project has only recently been proposed, the full details still need to be developed further.

The Environment Working Group are now seeking Council approval to progress with both parts of the Jubilee Tree Planting Project - 70 trees for 70 years, and 70 x 70 trees for the Jubilee.
